

The first five years of life are when a child's brain grows the fastest.

With simple activities like this one, you can make every moment with your child a brain building moment.

IMAGINARY FLOWER

Does your child like to pretend? Tell them there is an imaginary flower growing on their nose. Describe what it looks like. Then pretend to grab it! Now say there is a flower on their ear and grab it too. Have them describe and grab the flowers on you and enjoy the joke.

Brainy Background

Although pretending is lots of fun, it also teaches your child that one thing can stand for something else. These symbols are the basis of reading and writing, with words standing for objects and ideas. This game also develops children's creative thinking.
