

The first five years of life are when a child's brain grows the fastest.

With simple activities like this one, you can make every moment with your child a brain building moment.

## WOULD YOU RATHER?

Ask your child questions like, "Would you rather be a bird or a fish? Why?" Have them give you a few reasons from real-life experience like, "I love the water so I want to be a fish!" Then you take a turn answering their questions!

## Brainy Background

Asking your child questions helps develop their reasoning skills—especially when you ask questions that go beyond simple "yes" or "no" answers.
